California Commissioning Collaborative

## CCC Policy Initiative Objectives

- Support and build the commissioning industry infrastructure
- Expand Title 24 standards
- Support RCx program continuation
- Make RCx a sustainable EE strategy while maintaining general Cx goals

©California Commissioning Collaborative

## Building Standards and Cx Infrastructure

- Expand 2011 Title 24 Standards
  - Add Metering Requirements
  - Optimize New Acceptance Tests
- Continue Building Cx Infrastructure
  - Improve Compliance with Acceptance Test Requirements
  - Document and Distribute Tools & Information
  - Expand Existing Curriculum, Training, and Outreach

## Near-Term Program Support

- Support standardized calculations in project submittals and utility filings
- Support improved measure life estimates.
- Encourage techniques to increase savings persistence.
- Agree upon and support data requirements for common measures

## Longer-Range Program Goals

- Introduce common metrics and benchmarks for systems based approach to building functioning
- Provide research and projects that demonstrate value of systems approach
- Promulgate lessons from buildings with integrated EE and DR projects and differentiated cost and savings
